OUTPUT:-

Marvel Cinematic Universe

The Marvel Cinematic Universe has shown us many cosmic entities so far, figures of unimaginable power who make the concerns of Earth people seem small and petty. These include Thor, Love and Thunder's Eternity, The Living Tribunal (glimpsed in Doctor Strange in the Multiverse of Madness), the Celestials, the Watchers, and whoever happens to be holding the Infinity Stones at the moment.

However, the MCU has yet to introduce one of its greatest cosmic entities: Mephisto.

So who and what is Mephisto?

In Marvel Comics, Mephisto is a Satan-like being who dwells in an esoteric dimensional realm that he refers to as both "Hell" and "Hades."

However, it does not mean that Mephisto is actually the Satan of the Marvel Universe, but one of many malevolent entities who preside over infernal netherworlds. These other entities include Lucifer, Hela, and Eternity. Mephisto is the most prominent of these and one of the most powerful.

Mephisto's name was first mentioned in the comics as having been created as a being of pure evil by a supremely powerful figure who had been instrumental in the creation of the universe.
